NARRATIVE REPORT

☒ INTERIM☐ FINAL

Monitoring visit was made to ☐ on 9-10 March 1966. At this time the laboratory effort outlined in item 2 of the Work Statement was discussed in detail. The application of automatic focus detection to a rear-projection film viewer will be taken as a specific application for detailed attention during the project.

25X1

A breadboard will be constructed which will take into account film sizes and image magnification values that will be typical of future rear-projection film viewers. Representative parameters for such a rear-projection viewer were given to the contractor.

The first Monthly Progress Report has been received which outlines the basic laboratory approach that the contractor will follow.
